ANIMALS

'Experience it in Real Life!'

PENGUIN

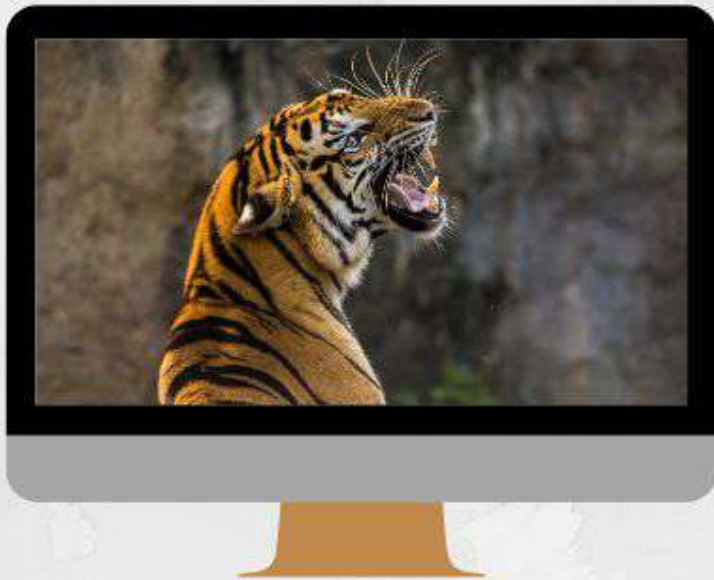

DID YOU KNOW?

- *Penguins can hold their breath for up to 20 minutes while diving*
- *They communicate using a variety of vocalizations, including whistles, brays, and even trumpeting sounds!*

"Point your device camera at the marker to See a 3D penguin come to life and hear the penguin chirp!"

TIGER

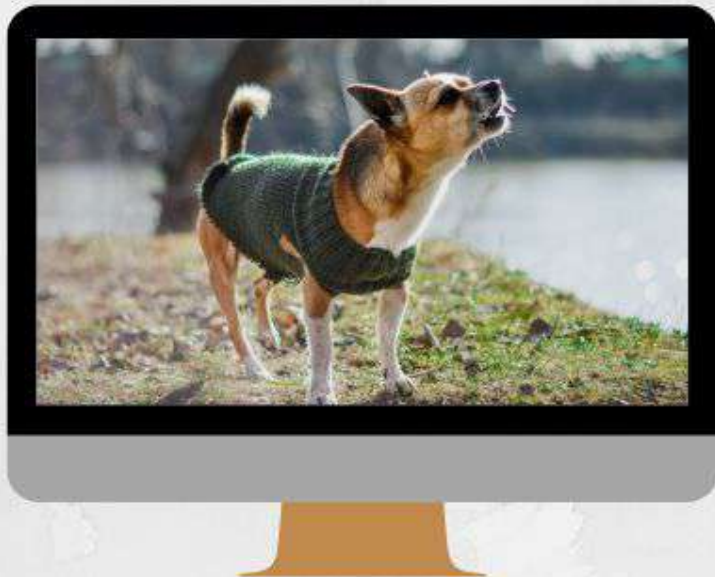

DID YOU KNOW?

- *Tigers have soft, padded paws that allow them to stalk their prey silently. This makes them excellent hunters, able to sneak up on unsuspecting animals.*
- *Tigers are the largest cat species in the world!*

Point your device camera at the marker to See a majestic 3D tiger come to life and hear its powerful roar!

DOG

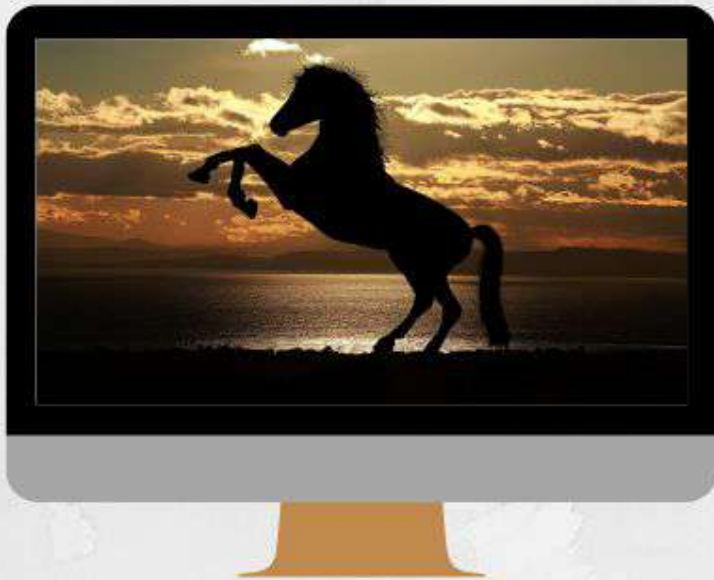

DID YOU KNOW?

- *While barking is their most common vocalization, dogs communicate in many ways. They use body language, tail wags, ear positions, and even facial expressions to convey their emotions and needs.*
- *There are over 200 recognized dog breeds worldwide, each with its unique characteristics and personalities!*

Point your device camera at the marker to See a playful 3D dog come to life and hear the bark!

HORSE

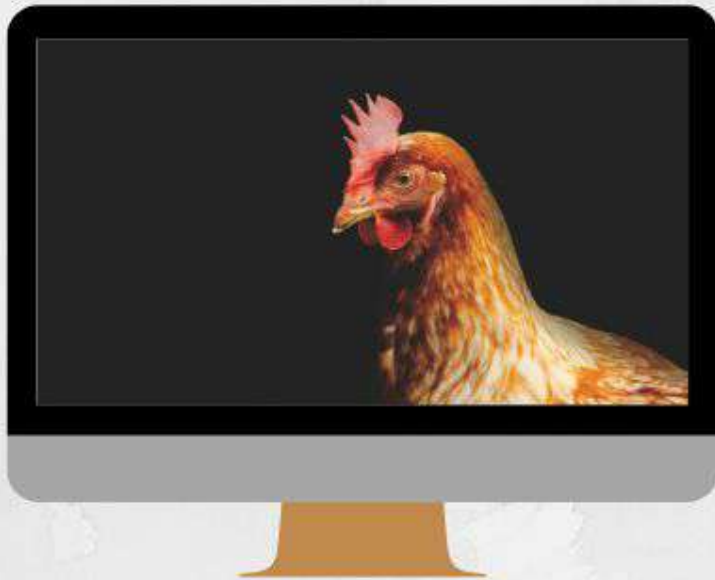

DID YOU KNOW?

- *Horses are incredibly fast animals! The fastest recorded horse racing speed is over 40 miles per hour (64 kilometers per hour).*
- *With good care, horses can live for 25 to 30 years! This makes them long-term companions and allows them to form strong bonds with their human caretakers*

Point your device camera at the marker to See a majestic 3D horse come to life and hear the whinny!

HEN

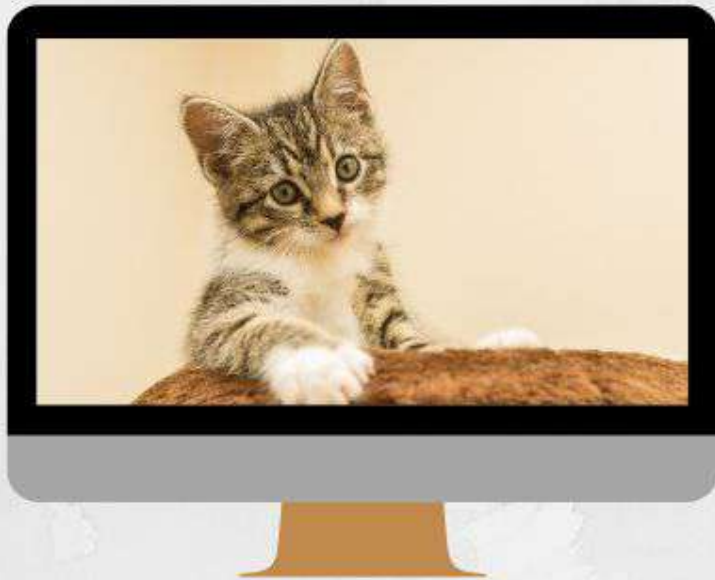

DID YOU KNOW?

- *Unlike most birds, hens love to take dust baths! This behavior helps them control parasites and keep their feathers clean and healthy.*
- *A hen's beak is a powerful tool! They use it for everything from pecking at food to preening their feathers and even building nests.*

Point your device camera at the marker to See a feathery 3D hen come to life and hear the cluck!

CAT

DID YOU KNOW?

- *While meows are a common way for cats to communicate with humans, their purrs are much more complex. Cats purr not just when they're content, but also when they're seeking attention, injured, or even giving birth!*
- *The oldest domestic cat ever recorded lived to be 38 years old!*

Point your device camera at the marker to See a curious 3D cat come to life and hear it meow!

TRANSPORTATION

'Experience it in Real Life!'

CAR

A car is a wheeled motor vehicle used for transportation. It typically runs on roads and is powered by an internal combustion engine or electric motor. Cars provide convenient and efficient means of travel for individuals and goods.

AEROPLANE

An airplane, also known as an aeroplane, is a powered flying vehicle with fixed wings and engines. It is used for transportation of passengers and cargo over long distances. Airplanes revolutionized global travel, making it faster and more accessible to people around the world.

SHIP

A ship is a large watercraft designed for navigation on oceans, seas, or rivers.

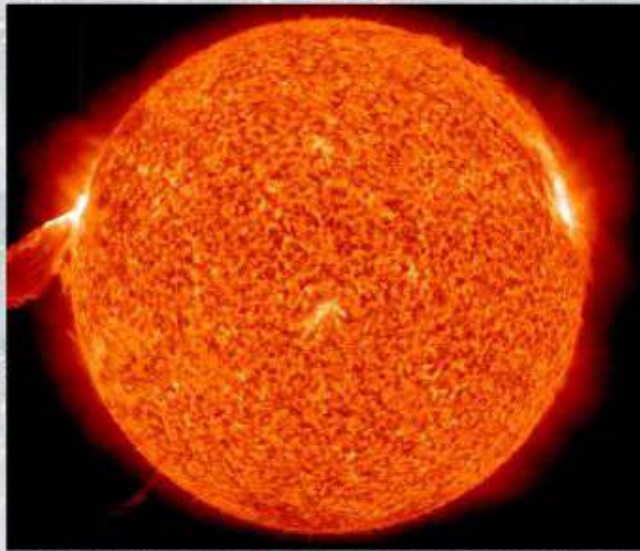

It typically transports goods, passengers, or performs specialized tasks like research or warfare. Ships vary greatly in size and purpose, from small fishing vessels to massive cargo carriers and naval warships.

GEOGRAPHY

'Experience it in Real Life!'

SUN

The Sun, our solar system's central star, fuels life on Earth with its intense light and heat through nuclear fusion. Its gravitational force shapes planetary orbits, while culturally symbolizing vitality and power across civilizations.
